Hi everyone,

As part of the QCrypt conference next month, we're having Michele Mosca give a public lecture on "Cryptography and Cybersecurity in the Quantum Era." If you're at all interested in this topic, I really recommend going. Michele is an excellent speaker, as well as an accomplished researcher.

The talk will be on Monday, Sept. 12, at 6pm, at the Carnegie Institution in DC. It is open to the general public, and registration is not required. (See the attached flyer for details.)

Cheers,

--Yi-Kai
