I think that is good. Thanks,

Lily

I could update our existing PQC poster to have some info about our standardization project. I'm not sure about making a poster out of our paper on the cubic matrix scheme.

We are extending the deadline for the submission of poster information to August 30. Please send email to Ginger White with the information requested in the enclosed email.

Thanks

Subject: ITL Science Day, October 13, 2016

Dear Colleagues:

This year, the ITL Science Day will be held all day on 2016-10-13 (October 13). We plan on having two prominent keynote speakers, in addition to presentations from several of your ITL colleagues. Please mark your calendars, as we would like as many ITL staff to participate as possible.

Poster sessions showcasing ongoing ITL work have been a highlight of the previous ITL Science Days. The enthusiasm of presenters and the keen interest of the audience has set a festive tone for the event. Participating is a great way to tell your colleagues in ITL about what you are doing, obtain input, and even identify new collaborators.

We will again have two poster sessions (morning and afternoon, each approximately two hours in length) with a different set of posters each session. We hope you will consider contributing a poster to this event. It doesn't have to be a lot of extra work. Perhaps you already have a poster that you produced for an external event, or one is coming up that you need to produce one for. You will need to register your poster so that we can assign spots. To do that, send an email to Ginger.White@nist.gov with the following information by August 22nd:

Title

Name(s) and Division numbers of presenter(s)

Names and affiliations of others working on the project

Special needs or other constraints (e.g., a table or extra space for a demo)

Thanks for your help in making ITL Science Day a Success!

Ram
