Subject: pqc-forum posting error
Date: Monday, December 05, 2022 08:01:58 AM ET

Everyone,

I apologize, but there is some kind of glitch going on with the pqc-forum. Users who try to post are getting an error message that says:

"The group pqc-forum@list.nist.gov has exceeded its quota for total number of external recipients."

I don't know why it's happening, and I've reached out to our NIST IT support, as well as to Google Groups, since I think the issue may be a google groups thing, and not specific to NIST. Hopefully I hear back soon. Again, I apologize.

As a possible workaround, you can try posting your message a few times. For me, the third time trying worked and it posted without an error.

Dustin
