Another update:

We had been hoping to announce the results of our PQC standardization process by the end of March. We ask for a little bit more patience since we are not ready to make the announcement today. We still expect to make it very soon.

It's been a long process, and NIST is grateful for everybody's efforts. We appreciate your patience for just a little longer.
Dustin

Hi Nist team,
From the following session slides, 3rd round was planned to be closed end of 2021 and 4th round opened subsequently. Is the current plan to close out Round 3 soon?

Everybody,

We appreciate your patience. The announcement of the algorithms we will standardize is still coming very soon. This is a major milestone of our project, and the delay is not due to technical considerations but is due to some legal and procedural steps that are taking more time than we anticipated. Again, thank you for your patience.
The PQC team

Hello Dr. Dustin Moody,

Time goes fly so fast.

Do you have any update on this topic because my customer has been waiting for something official release. :-)

Have a great day.

Regards,

BH.

BH,
Yes, time does fly fast! We are still very close to being able to announce, and expect it will be very soon. We don't have a specific day that we can say will be the day. Progress is being made on the steps that need to happen.

Dustin
