Subject: [pgc-forum] Speaker Proposals Sought: Intl Cryptographic Module Conference (ICMC), deadline Tuesday
Date: Monday, April 11, 2022 09:25:26 AM ET

The ICMC Program Committee seeks high-quality vendor-neutral proposals for conference presentations from industry professionals who have experience with commercial cryptography. At ICMC22 over 400 industry leaders from 27 countries will come together to address the unique challenges faced by those who develop, produce, test, specify, and use cryptographic modules, with a strong focus on standards such as FIPS 140-3, ISO/IEC 19790, eIDAS, and Common Criteria. The conference helps to foster a focused, organized community of users. ICMC reviews technical issues underlying cryptographic implementation including physical security, key management, side-channel analysis, open-source development, algorithm testing, quantum threats, embedded applications, standardization, validation programs, government policy, professional ethics, and more.

ICMC will be held September 14-16, 2022 at the Westin Arlington Gateway, Virginia, USA

Submission information is here: https://icmconference.org/?page_id=24

The final deadline to submit speaking proposals is April 12.
