Rene,

I just wanted to check if you were okay to give part of the crypto club talk. I was hoping you could speak on multivariate crypto, and the miscellaneous systems which don't fall into one of the main families. Would that be okay? We have lots of slides that we can use, since Daniel has given several talks on multivariate, and I've given a talk on isogeny-based systems. I'm trying to see if I can get Daniel to talk via video conference, but if that doesn't work, I'm hoping you can. Let me know.

Thanks,

Dustin
