Hi Dustin,

I have blocked 10:00 AM – 12:00 noon for April 12th for us. The Federal PKI Policy Authority (FBKIPA) is asking for a short (maybe 30 min) brief on quantum computing and NIST's approach to counter the threats of QC. Lily thought that you'd be the best candidate to give an overview. I'll be there too so I can answer any question related to QC and PIV.

Let me know if 4/12/16 works for you or if you have a conflict (I did not see any on your calendar).

Thanks,

Hildy
