Let us agree that we don't need to discuss "Know's", "Wisdom",.

Any other than we can dispose of quickly ?

Rene.

Subject: PQC comments

Everyone,

Sorry I have been out of contact. I am in Toronto, and forgot to bring my RSA token, so it's been harder to access my NIST email. Thank you Lily for sending out a file with the PQC comments. I'm attaching an updated version which has a couple of comments she missed. The most important of which is Jintai Ding's. (The other ones were basically spam or not serious ones).

Thank you to Jacob for organizing the comments into the sections of our CFP. Everyone please read the comments, and we will discuss them at our next meeting. Please also feel free to discuss them before then, so we can have a productive meeting.

Dustin
