Attached please see my comments. I started going through at the beginning of this week. What I commented may not be the latest version. I am impressed about the progress we made.

Lily

I like the new discussion of security against quantum attacks much better. I would even go so far as to say I am pretty happy with it!

Best regards,

Stephen

Hi Ray,

Thanks, I agree with most of your changes (and I don't have serious disagreements with any of them). I added a few comments, and cleaned up the file (removing the old versions of the text that were marked for deletion).

Everyone:

Could you read through the whole document now, and make any remaining comments by Friday?

Thanks!

Thanks Yi-Kai.

I read through your changes and provided comments. I took your statement that the section on quantum cryptanalysis still needs a bit more work as an invitation to edit it extensively. I also moved a paragraph of text in section 3. I think everything else is intact aside from some comments and replies to your comments.

Cheers,

Ray

Hi everyone,

I went through the CFP and made a bunch of edits. I think it's in pretty good shape.

The section on quantum cryptanalysis still needs a bit more work, but I think it is converging to a good solution. Ray, thanks for your work on that!

Cheers,

--Yi-Kai

Subject: Final revisions of the CFP for our first draft

Ray, Yi-Kai,

Please use the attached to make your revisions. I believe Ray is going to address some things in Section 3 and 4. Yi-Kai will work on the remaining few comments. They plan on being done by next Monday, COB.

Starting next Tuesday, we want everyone to read the CFP and provide feedback by Friday. We can then send the CFP to Andy, Matt, Donna, etc... the following week.

Thanks everyone!

Dustin
