Hi Ron,

Yes, I am interested.

Regards, Rene.

Subject: Save the date: QuICS Stakeholders Day Feb 28

The NIST/UMD Joint Center for Quantum Information and Computer Science (QuICS) will be holding its annual Stakeholders Day the morning of Tuesday February 28 in College Park. The event features an overview of QuICS activities, a few high-level talks on current research thrusts, and a poster session with QuICS postdocs and graduate students. We'd be delighted to have you attend and learn more about QuICS. If you are interested, please respond to this email and I will provide you will further details as the date nears. Please feel free to forward this invitation to anyone at NIST that you feel might be interested,
Ron
