I added a new column to the master table on whether I've also checked the comments.

(I also hid a column I created on Monday separating schemes into Key agreement/exchange or signatures [to minimize complexity of the problem-type table]. I don't anticipate this will be a problem for you or anyone but I figured I'd mention it).

Subject: Before You Respond to Anyone That Their Submission is Complete

I am going to want to go back over most of the submissions to ensure that they've met the I/O function specification comments standard I've set for Bernstein and some other submitters.

(before I was just looking through the code seeing if I saw a "good number" of comments).

So just a heads up that most of my reviews should currently be considered incomplete, but before I go back I want to at least get the more serious coding issues dealt with and do a first run-through.
