I'm at home today, but will be at NIST tomorrow. You can sign for me if that's allowed.

OK, the bell is ringing in my head. I remember you mentioned that this would happen when both of those papers were approved. I think we can do this as a noting. You sent me the randomness paper, so let me enter it into NIKE and I'll have you sign off. Are you hear today? OR should I sign for you?

Carl,
CONGRATS!! I'll take care of the NIST-266. I'll let you know if I have questions.

Subject: Published paper

Hi Sara. The first of my papers as a NIST employee has been published!

<http://www.rintonpress.com/xxqic17/qic-17-78/0595-0610.pdf>

Thanks for all your help with moving this along. Now I have a question: I think I'm supposed to fill out a NIST 266 form to notify NIST of the publication. There's an issue because the paper was original approved as two papers ("Certifying the absence of quantum nonlocality" and "Certified randomness between mistrustful players") but was published as a single paper ("Randomness in Nonlocal Games Between Mistrustful Players"). I can think of a few different possible ways to handle this – one would be to try to edit the titles of one of the approved papers on nist.gov. But I'd like to do whatever will create the least mess – what do you think?
