---

Today is probably the only Friday in December I'll be in.

But if we don't meet in December, that's okay. Good luck on your finals.

Hello Dr. Moody;

Everything's going well as usual for me. I'm currently in my final exam period, and I'm graduating after this. I'll see you on Friday when you're in office.

Thank you.

Thinh Dang

Thinh,

This is the isogeny-based scheme that is going to be submitted to our PQC standardization project. You might be interested in taking a look. Please don't distribute this outside of NIST.

How's everything going? I believe you are getting close to graduation? I hope everything is going well. We should meet up again sometime, however, I will not be in the office either of the next two Fridays.

Dustin
