Thanks for all the answers. Yes, on the Crypto Standards Development overview....I sent to Andy early last week, no response. So I thought I'd at least get the information up there and update when he has time to review.

Hi Sara-

Thanks for asking—

- 1) No need to include "(pdf)" with the link. As far as where to put it—I'd recommend making in more prominent, at the top of the page (e.g., see the main Standardization page).
- 2) Removing Call for Proposals Announcement page—agreed.
- 3) Extra: BTW on the Standardization page, I:
 - a. added a box at the top that highlights the deadline & link to Call for Proposals (instead of putting it at the bottom) and removed the "(pdf)";
 - b. changed the last two references to <http://www.nist.gov/pqcrypto> to links to the Call for Proposals. Sending people back to the project landing page is confusing.
 - c. removed "The National Institute..." from the beginning of the announcement. I think one of the writing changes we need to make website-wide is to stop spelling it out—it's already on the logo at the top of each page. 😊

Crypto Standards Development

-222MB—that's crazy-big, and we need to break that into multiple files. It's only been downloaded 57 times since it was posted in July 2014, and not since January 2015. I'll check with Christian to see what the file size limit is, so we can break it into the right # of files.

-observation: the Overview text on the main page is out-of-date (especially the first paragraph!) and needs to be rewritten. Something for Andy or Donna.

OK—both projects are checked back in for you.

Jim

Call-for-proposals

Two thoughts on the above

- At the bottom of each PQC Standardization page, there was a link to a printable call for proposals that had the PDF icon. For continuity, what you like that type of link to say on the new site?
 - [Call for Proposals](#) (pdf)
 - [Printable Call for Proposals](#)
 - Other
- I think we can remove the new “Call for Proposal Announcement” child page; we didn’t have text/html for the old “PQC Standardization” menu item; it was just a menu item. I put the “Announcement” text on the PQC Standardization child page. WDYT?

PROJECT - **Crypto-Standards-Development-Process**

Subpage - **NIST-Briefs-Committee-of-Visitors**

One of the files, from this project, was too large. Zip file @ 222KB. It contains all the FOIA material that was released related to the SP 800-90 Process. Can we override?

Talk to you Thursday,

Sara
