Thanks - the email from Kent said the info we sent last night was for a meeting on Monday... but let us know what you hear

If that is the case and if the yesterday memo was for an OSTP visit then that context would have me list different programs.

Now that's a lot of ifs, but, in my recent conversations with OSTP they are interested in:

- Quantum, the overall program and PQC
- HPC, the overall program and security for HPC
- Software/System Assurance
- Next Generation Identity

I will see what I can find out this morning and let folks know.
