Subject: Post Quantum Initial Submissions

Scott,

Here's the information Lily reported a few moments ago:

10 signature schemes (3 lattice, 3 multivariate, 1 hash based, 3 other)
26 KEM/Encryption schemes (12 lattice, 7 code-based, 1 multivariate, 1 isogeny, 5 other)

Also, Jean-Phillipe Aumasson has a website that is an unofficial page detailed to submissions. It can be found at:

<https://post-quantum.ch/>
