Subject: RE: some small PQC updates

OK, I think I took care of everything on old CSRC. I will work on the new site tonight or tomorrow (and any other updates you may have). I am on AL this afternoon to help my son move out ☺ – so I am leaving for the day!

FAQ 15 – using 2nd file you sent
API v4 document moved to “Archive”
API document sent today, replaced on Example Files (and will be v5 when archived)

This can be added as just a new question that will be in the FAQ. It doesn't need to be in its own section or anything.

But please use the attached version. Ray already found a mistake that has been corrected in this version.

So you want this to be the start of a new “section” of FAQs? And not have it under the PQC Call for Proposals? Just confirming....

Subject: some small PQC updates

Sara,

Can you add a new question to our PQC FAQ? It's contained in the attachment called FAQ-randomness. Also, can you update our API document to the one attached? You can put them in whatever format/font etc. that you want to. Thanks,

Dustin
