Angela,

You can request an invite.

Lily

Hi Angela,

I will let Lily reply to your question whether or not to request the invite, since she approves your travel.

However, I can inform you about the following training requirement that you have to complete prior to your departure, so that you can start working on them:

1. [Basic Travel Training Curriculum \(DEADLINE DEC 31st, 2018\)](#) – You can complete this in CLC.
2. [Fly America Act Curriculum \(DEADLINE DEC 31st, 2018\)](#) which includes the Open Skies Agreement – You can complete this in CLC.
3. [Foreign Travel Briefing \(DEADLINE – any time prior to your departure\)](#) You can complete this in CLC.
4. [High Threat Security Overseas Seminar \(HTSOS\) \(DEADLINE – any time prior to your departure\)](#)

I have to register you for this seminar. I will send an email to the entire group inquiring if anyone else needs to take it. (Since this is a new requirement for travel to all foreign countries starting January 1st, 2019, I am sure there will be other people who will need to take it.) We have to pay for this seminar (\$125 per person). It would save me some time if I could register multiple people at the same time rather than one by one. So, let's wait a little to allow people to respond to my email.

Please, let me know the dates of completion and certificate numbers (if provided) for all these trainings.

Thank you,
Zuzana

Okay, sounds good. The ZKProof workshop doesn't seem to have registration. Instead, one must request an invite. Should I request an invite?

Thanks!
Angela

Hi, Angela,

For PQCrypto, we probably should start to get you an official passport after holiday. We will generate a "pseudo" travel order so that you can start the process of applying a passport.

For ZKProof workshop, maybe we can work on it in March, unless there is an early registration deadline.

I think for both China and Canada, you will need to take the training provided by Department of State. I will ask Zuzana to get you registered in the beginning of next year.

In any case, we must hand the travel one by one. If you have any question, please let me know.

Lily

Subject: 2019 Conferences

Hi Lily/Andy,

Per Donna's request, I have looked into conferences that are of interest to me in 2019. My current focus is quantum-safe, efficient zero knowledge proofs of knowledge. As such, here are 3 conferences that I have some interest in attending. I don't list 3 to attend all 3; I'm happy with only

attending one.

- [2nd ZKProof Workshop](#) – a zero knowledge proof standardization effort.
 - April 10-12
 - Berkeley, CA
- PQCrypto 2019
 - May 8-10
 - Chongqing, China
- [Selected Areas in Cryptography \(SAC 2019\)](#) – the special topic for SAC 2019 is real-world cryptography/cryptographic protocols in practice
 - August 12-16
 - Waterloo, Ontario, Canada

Thank you,
Angela
