I will be presenting them at a conference next week, so you can treat them as public. (80% of the slides have been made public before).

I'm working from home today, but will be on campus tomorrow.

Thanks Dustin, these are great.
Are they public so can I reuse them? And, perhaps Monday we can go through them real quick. I just have small questions on some of the abbreviations.

Matt,

Slides attached. I can go over them with you if you'd like to make sure you know the answers to any questions you can anticipate.

Dustin

I'll have some slides done by tomorrow that should help with that.

And, before I do; I would like to grab someone for about 30mins to be sure I am up to date on latest draft and decisions on things like RNG; use of Shake and any tweaks etc.

It sounds like CISA is holding a Cyberstat webinar on March 28th focused on PQC migration. Is anyone from NIST speaking?
