Hi,

Sorry, I was using the comment feature before with no problem, but now it is not working for me at all. I have no idea why. I inserted a comment in the text, completely ignoring your requests to not do that. Sorry!

Cheers,
Daniel

I'd agree with David that we should just use the commenting feature at this point. If you want to make comments some other way, just send an email, and we can insert them into Overleaf for you.

Please regularly go check for comments and help resolve any that you can. I'll try to directly contact you if I think you could provide some feedback for a particular comment and you haven't addressed it.

Great job by everyone - we've almost got it done. Thanks,

Dustin

Everyone,

I can't seem to get the commenting feature to work--maybe because I'm using a weird browser (Brave)? Maybe I'll just write comments separately and email them or something if I can't figure it out, but it seems kind of awkward.

Hi all,

I would like to suggest that anyone wishing to comment on the 3rd round report at this point use Overview's commenting feature rather than inserting comments into the body of the document.

I am concerned that comments inserted into the body of the document at this late stage will be missed and will accidentally end up in the final document.

Thanks,

David
