Hi Dustin,

Thanks for the update, and no worries! I figured I must be missing from some mailing list or something. I should have thought to ask about it earlier. Can you sign me up for [internal-pqc@nist.gov](mailto:internal-pqc@nist.gov) or is there a way for me to do that?

Best,  
Matt

Matt,

I'm sorry! Are you on the [internal-pqc@nist.gov](mailto:internal-pqc@nist.gov) email alias? You would know if you got a few emails from me this morning. Yes, we did have a short meeting. I normally check my email and would have gotten your message, but I dropped off the NIST VPN during the meeting.

I will be sure to include you on future messages. Right now, our PQC team has been writing up a report to document and explain our decisions for the schemes which will advance to the 3rd round. You can see the report at:

 [PQC Report on Round 2.docx](#)

Dustin

Hi Dustin,

Quick Question: Is the post-quantum seminar running this morning? Do I already have a link to it somehow? I thought I did, but maybe not.

Best,  
Matt

Matt,

We're having a meeting for PQC at 10am this morning. Feel free to join. I'll write you an email after the meeting to explain what's going on. Glad we finally connected!

Dustin

**Subject:** Post-Quantum Crypto Group meeting today?

Hi Dustin,

I was planning to start attending the Post-Quantum Crypto group meetings, but I just realized I don't know if they are still running, and if they are, I don't have the link for them (since they'd presumably be virtual now). Do you happen to know either of these things? Also, I apologize for missing your email to me in the Fall! I must have missed it back when I was still setting up. I just found it now while writing this to you. I'd be happy to chat sometime, and I'll respond to that email directly soon.

Best,  
Matt
