---

For me: (off the top of my head)

Public Announcement of Post Quantum Candidates for Standardization: December this year.

Publication of Block Chain foundations document: January this year.

FIPS 140 move from government standard to International Standard announced: March this year.

First PQC Workshop presenting candidate algorithms: April this year.

Opening of FIPS 200 for public comment: In the first 6 months.

**Subject:** Kevin K called regarding a WH data call

Asked for any big announcements we expect in the first 6 months of the new year.

I mentioned CSF in spring, and botnet report in May.

I told him I would get back to him on other things like FIPS schedule (199/200/other?), crypto, etc.

Anything else big expected through June?
