Daniel:

We just need to plan early for all the travels, including invitational travels. All the requests will be submitted to ITL for approval.

Thank you for understanding,

Lily

Hi, Lily,

I'm sorry for botching the arrangements for Oscar. He had let me know that he could ask Philips to pay, but since I was the one to invite him, I thought I would ask for us to pay. I should have reached out to him much earlier to make arrangements, since I spoke to him about this in February. We only began discussing the details this over the weekend. Thanks anyway, (and to you, Morrie) for your help.

Cheers,
Daniel

I talked with Oscar. He understood and said that he can pay through his company.

> It is not the matter of whether we have the funding or whether we shall sponsor his visit. The time will not allow us to put his travel request in the system. We have the cycle every two weeks. The next cycle submission date is next Monday (May 15). The earliest we can get the approval is next Friday (May 19). But most of the time, we will not get it until the next Monday (May24). [I explained the drill to Daniel when he was last time in the campus.]
