Folks,

Like previous years, we have a large NIST group attending. We also have a booth that will attract many visitors, and NIST folks will staff the booth throughout the week. There are also many programs that will attract a lot of attention, and possibly questions from folks we run into throughout the week.

To help us prepare, please send 2-3 top-line talking points and appropriate point of contact for each NIST program listed below to Kristina Rigopoulos by COB Wednesday 2/27/19. The purpose will be to share these points with all staff so they know summary information and the best NIST point of contact to refer questions.

- Artificial Intelligence
- NICE, including Workforce Framework
- IoT cybersecurity
- Privacy
- Crypto (PQC and FIPS 140-3)
- Small Business Cybersecurity Corner
- Supply Chain

The summary points can be as simple as providing NIST's role in the program, what we are doing, and identify the best point of contact.

Thanks as always for your help.

Kevin
